

CASE C - transmission limited

Static audit; no contact, receiver, preload dynamics, or grasp-success criterion.

A shape/rank: [21, 25] / 21

Residual: 0.00506283828227 Nm (0.986908% of required-force norm)

Force limits inactive: bounded and unbounded solutions coincide.

Dominant residuals occur as opposite signs within distal fixed-tendon pairs.
