

Phase 2W static wrist feasibility map

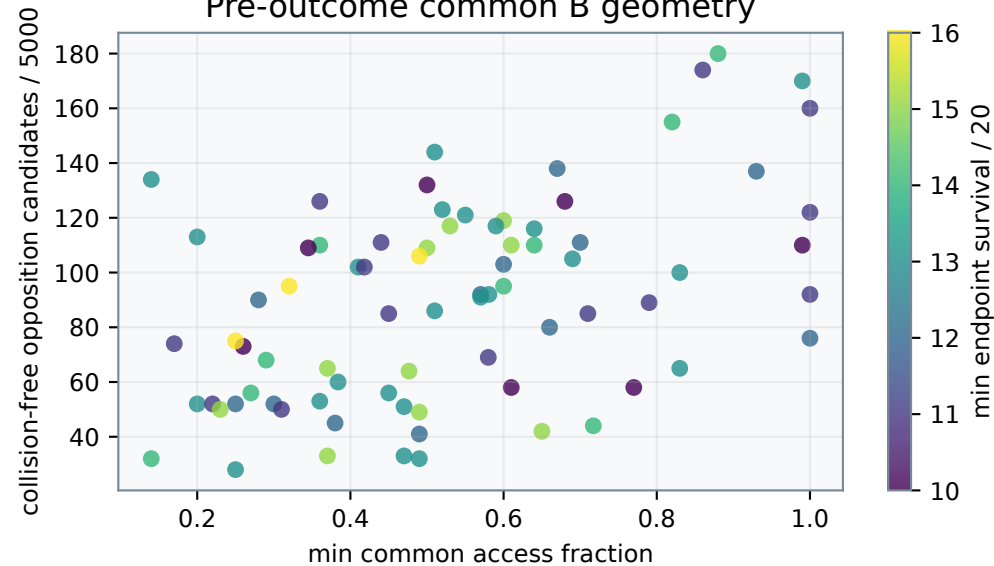

Coarse static wrist endpoint survival

Refined static wrist endpoint survival

Pre-outcome common B geometry

Phase 2W search summary

Coarse: 93 unique poses; 18 endpoint-eligible

Refined: 114 unique poses; 60 endpoint-eligible

Geometry mapped: 78 poses x 5000 B candidates

All mapped poses had nonzero common opposition access.

Two-contact Ferrari-Canny epsilon remained zero (descriptive).

No A+B outcomes were used in search or ranking.
